

The IMPACT Project

The IMPACT project is designed to help people to gain a job or get a better job if:-

- they have the right to work in the UK
- they are not British citizens
- they are not citizens of EU countries

Unfortunately it is not open to Asylum Seekers or Refugees.

An adviser may help you to improve your chances to gain a job or get a better job by:-

- Finding out about your skills and experience gained in other countries which may be useful for work in the UK
- Recognising the qualifications you have gained outside the UK
- Helping you to prepare a CV
- Advising on courses and placements that might lead to employment
- And in other ways.

Financial help will be available so that you can afford to improve your chances of employment. For example the IMPACT project could help you with the costs of course fees, childcare, bus and train fares, and other costs, which will enable you to have your existing skills for employment recognised and developed.
