

### COMPUTER BASED THEMED WORKSHOP

#### What is the course about?

This course provides a practical introduction to learners who are new to using ICT. It is suitable for learners who prefer not to take exams and would prefer to work on their own projects.

#### What will I learn?

After discussion with the tutor your programme of learning will be decided. This may include:-

How to improve your skills in computing whilst presenting your own stories, poems etc.

How to change the look of your own writing by using different font styles/sizes and bring in pictures using Clip Art and the Internet

Search the Internet to find information for your personal project.

#### Entry Requirements

No previous knowledge is required. This course is suitable for beginners

#### What will I need to bring with me?

A pen and a notebook to make your own notes.

#### How will I learn?

You will learn through demonstrations, handouts, question and answer sessions and group work.

#### How will my learning be assessed?

The tutor will mark the learners work on a weekly basis.

#### What qualifications will I get?

This is a non-accredited course, which means that you won't be working towards a qualification

#### Are there any extra costs?

No

#### What can I do next?

Entry Level 3
