

## HOW TO USE YOUR DIGITAL CAMERA

### What is the course about?

A 14 session course to learn more about and use your digital camera. The course also covers how to download images on to the pc and then print some. Image manipulation will be minimal and does not involve the use of Photoshop

### What will I learn?

Learners will practice using various controls such as macro and flash as well as the movie mode and how to make colour prints of varying sizes

### Entry Requirements

No formal qualifications are required ... but just an enthusiasm for photography

### What will I need to bring with me?

Learners should bring their camera together with the instructions and leads that came with it. There are a limited number of cameras available at Remit which can be borrowed for those who don't have a digital camera. In addition learners should bring pen and paper to make notes.

### How will I learn?

By instruction and demonstration. A digital projector is used to present information and show images

### How will my learning be assessed?

By individual and group discussion and review of prints achieved.

### What qualifications will I get?

There is no formal accreditation

### Are there any extra costs?

No

### What can I do next?

Undertake another course to further develop your skills with using camera
